

# Great Oladipupo

## Fullstack Developer

Problem-solver with a practical approach to building robust and scalable web applications. I specialise in backend development with Node.js and Express, and I have experience deploying applications on platforms like AWS and GCP. I enjoy working with databases (SQL & NoSQL), automating tasks, and writing clean, maintainable code.

## EDUCATION

### Computer Science (B.Sc)

#### Landmark University

10/2022 - Present

Omu-Aran, Nigeria

## WORK EXPERIENCE

### Web Developer

#### CHSG Technologies

04/2023 - Present

LAWRENCEVILLE GA, UNITED STATES

##### Achievements/Tasks

- Developed and maintained web applications using a combination of front-end technologies such as HTML, CSS, and JavaScript, as well as back-end technologies like Node.js and Express.js.
- Designed and implemented database structures using SQL and NoSQL databases to efficiently store and retrieve data for the applications.
- Conducted code reviews, identified areas for improvement, and implemented best practices to ensure code quality and maintainability.

### Storage Engineering Intern

#### IEFE International

04/2025 - Present

Ikoyi, Lagos

##### Achievements/Tasks

- Gaining hands-on experience in data center environments, focusing on enterprise storage infrastructure.
- Assisting with setup and configuration of storage systems including Dell EMC PowerFlex and PowerMax.
- Learning core storage concepts such as RAID levels, SAN/NAS architecture, and fault-tolerant data solutions.
- Exposure to enterprise-grade hardware, power management, and high-availability design.

## SKILLS

Typescript, Python, PHP, Node.js, Flask,

Rest API's, Web Sockets, Django, React, HTML, CSS

Bootstrap, Tailwind

MySQL, PostgreSQL, MongoDB, Redis

AWS, Heroku, Render

## PERSONAL PROJECTS

### Neone Web 3 Telegram bot (11/2024 - Present)

- Designed and implemented an automated bot to monitor TRON wallet balances and execute transactions when specific thresholds are met.
- Integrated TronWeb library for seamless interaction with the TRON blockchain.
- Configured secure private key management and multi-signature wallet handling to ensure transactional security.
- Deployed on AWS using Ubuntu, implementing secure logging and error-handling mechanisms.

### E-library Web App (11/2024 - Present)

- Created an eLibrary for managing digital book collections using **Flask** and **Next.js**.
- Set up APIs for user interactions, book uploads, and search functionality.
- Configured database schemas to store metadata for books, authors, and users.
